

**AI FULL STACK  
DEVELOPER**

# AI Engineer Master Program

- It is a comprehensive curriculum that integrates advanced AI model development with modern full-stack web development techniques.
- This program empowers developers to create complete, data-driven applications powered by deep learning and generative AI.

## Prerequisites to Learn AI Full Stack Development

- Basics of programming fundamentals (e.g., Python, Javascript)
- Knowledge of full-stack concepts (e.g., React, Node.js)
- Fundamentals of Data Science and Machine Learning

Training from AI  
Industrial Experts

Hands on AI  
Practicals / Projects

100% Career  
Placement Support

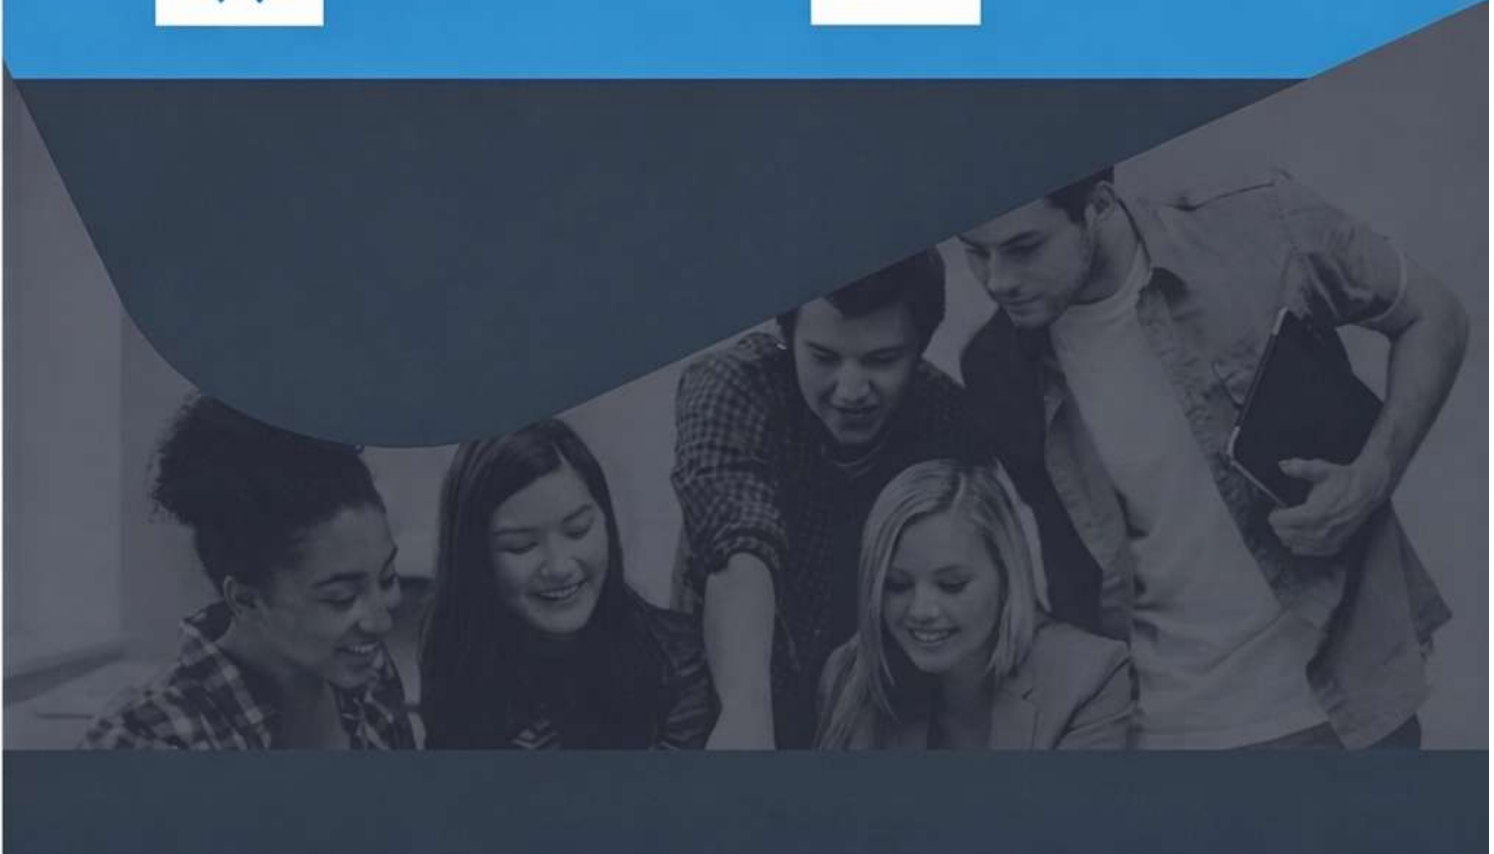

24 x 7 AI  
Expert Support

Certificate in AI Full  
Stack Development

Free AI  
Tech Demo

## We Provide

---

Full-Stack  
One to One

AI/ML for  
Developers

Faculty Tech  
UpSkilling

Custom  
Corporate AI

Onsite Team  
Training

Live Online  
Program

Flexible  
Weekend Class

Hands-on AI  
Workshop

AI Tech  
Seminar

Intensive  
Crash Course

## AI Full Stack Developer Program Includes

---

- Integrated AI & Full Stack Curriculum
- Generative AI Project Development
- Cutting-edge AI Model Deployment
- Data Science & API Best Practices
- Project Portfolio Review
- Industry Certification & Career Support

## Python Programming

- ✔ Variables & Data Types
- ✔ OOP Concepts
- ✔ Functions
- ✔ File Handling
- ✔ Exception Handling

## Frontend Development

- ✔ HTML Basics
- ✔ CSS Styling
- ✔ Responsive Design
- ✔ JavaScript Basics

## Backend Development

- ✔ Flask / Django Basics
- ✔ Routing
- ✔ Forms Handling
- ✔ API Basics

## Machine Learning Integration

- ✔ ML Model Basics
- ✔ Loading ML Models
- ✔ Prediction Integration

## Database Integration

- ✔ SQL Fundamentals
- ✔ SELECT Queries
- ✔ Joins
- ✔ Database Design

## Generative AI Integration

- ✔ OpenAI API
- ✔ Prompt Handling
- ✔ Chatbot Integration

## REST API Development

- ✔ API Concepts
- ✔ CRUD Operations
- ✔ JSON Handling
- ✔ API Testing
